DERM PERFEXION

PRX Derm Perfexion is the result of inspired research by noted dermatologist Dr. Rossana Castellana. Her scientific innovation yielded an international patent, and to date 3+ million treatments have been administered globally.

Now the amazing experience of genuine Italian skin biorevitalization is available in the United States as well.

You'll appreciate the advantages ...

- Immediate, natural-looking results with palpable firming, smoothing and brightening
- Rapid application (facial in ~20 mins)
- Topical application - no needles, no pain
- Zero down time - no peeling or frosting
- No photosensitivity - available all year round
Proper use of a quality SPF product is recommended for direct sun exposure.
- Suitable for all skin types (Fitzpatrick I-VI)

PRX Derm Perfexion achieves these dramatic results by stimulating the skin's regenerative process.

The unique and proprietary formulation of PRX Derm Perfexion *modulates* the effect of high-concentration trichloroacetic acid (TCA) with the beneficial effects of low-concentration Hydrogen Peroxide (H₂O₂), providing both immediate and sustained improvement to the look and feel of your skin without invasive measures or downtime. It is administered topically using a relaxing, lifting massage technique.

You'll look and feel great!

Ask your aesthetic professional how PRX Derm Perfexion can help you achieve the beautiful, firm, radiant skin you want!

Skin Beautifying Liquid

Applied by your aesthetic professional during treatment to initiate deep stimulation.

Protocol Home Therapy

This program is specifically formulated to nourish and restore your skin between treatments, ensuring you achieve full & sustained results.

1. Moisturizing Face Cream

Apply this rich, natural moisturizer in the morning, evening and as needed when your skin feels dry or tight.

It is specifically formulated to restore

the skin's hydrolipidic barrier and provide the necessary calming, deep nourishment between treatments. Face Cream is packed with high-quality Shea butter, active ingredients such as vitamins A and E, and select plant extracts.

2. Eye Contour & Facial Serum

This uniquely light & textured emulsion is easily absorbed by the skin, helping to maintain tone and active, rich hydration. Facial Serum can be applied over makeup to support on-the-go skin hydration, making it perfect for at work & active lifestyles.

Designed specifically for delicate skin, it will improve the appearance of wrinkles, crow's feet, under-eye bags and dark circles.

Facial Serum is not a substitute for proper use of Moisturizing Face Cream. Use sunscreen and limit intensive sun exposure, this contains AHA which may increase your skin's sensitivity to the sun and particularly the possibility of sunburn.

3. Facial Smoothing Fluid

Starting the evening after your treatment, this mild resurfacing agent combines low-pH Glycolic Acid (~3) with a balanced formulation to help stimulate and regenerate skin, providing a smoothing action that results in compact, uniform skin. Extensive testing has shown is well-tolerated by all skin types and

does not cause burning if applied to intact skin.

Wait 30 minutes before applying any other product.

PRX Derm Perfexion's results speak for themselves.
